

COURSE OUTCOME – PEDIATRICS

At the end of the course the students shall be able to:

- 1) Take detailed history, perform complete physical examination including neurodevelopment and behavioural assessment and anthropometric measurements of the child and make clinical diagnosis.
- 2) Perform relevant investigative and therapeutic procedures for the paediatric patient.
- 3) Plan and advice measures for the prevention of childhood disease and disability.
- 4) Play the assigned role in the implementation of national health programs, effectively and responsibly.
