

COURSE OUTCOME – PSYCHIATRY

At the end of the course the students shall be able to:

- 1) Identify social, economic, environmental, biological and emotional determinants of health in a given case, and take them into account while planning therapeutic, rehabilitative, preventive and promotive measures/strategies.
- 2 Understand the biological, psychological, social, economic and emotional aspects of psychiatric illnesses including possible preventive measures, for mental wellbeing and contemporary advances and developments.
- 3) Demonstrate empathy and humane approach towards patients and their families and exhibit interpersonal behaviour in accordance with society norms and expectations.
